PROFESSIONAL SUMMARY

Engineering leader who builds the systems that make affiliate marketing operations run at scale. I own the full technology stack at GrowthFusion (affiliate marketing): campaign automation, creative testing, conversion tracking, affiliate attribution, and analytics across Meta, Snapchat, TikTok, Google, and Newsbreak. First engineer hire. Scaled the team to seven. Every system I build is measured by one thing: revenue.

EXPERIENCE

Development Lead | *GrowthFusion (Affiliate Marketing)* | Aug 2025 – Present · Bengaluru

First engineering hire. Built and lead a team of 7 across frontend, backend, ad ops, and AI automation.

- 80 initiatives tracked in Q2 2026, 74 shipped (92.5% ship rate).
- Core backend in Java + Spring Boot. Event-driven pipelines on Kafka + ClickHouse. Sub-2s dashboards for 12+ media buyers.
- CI/CD and cloud infrastructure across AWS and GCP. Zero-downtime production record.

Web Developer & Tracking Specialist | *GrowthFusion* | Dec 2024 – Jul 2025 · Coimbatore

- Affiliate landing pages, conversion tracking infrastructure, cloud hosting, and CI/CD across multiple live properties.

Full Stack Developer Intern | *Quinbay* | Jul 2022 – Feb 2023 · Bengaluru

- Java + Vue.js. 500+ unit/integration tests. Sprint planning and technical documentation.

KEY PROJECTS LED

1. Adelevate: Affiliate Campaign Automation & Operations Platform

- **Rules engine:** 150+ active rules managing pause, activate, budget, bid, and dayparting across Meta, Snap, TikTok, and Google. Runs 24/7.
- **Unified dashboard:** 5 platforms, 48 ad accounts, 12 report pages, 20 sortable metrics, 3-tier RBAC. One interface for everything.
- **Reporting layer:** ClickHouse Materialized Views for sub-second queries. Self-hosted Airbyte ETL, replacing paid SaaS ($1,000+/month saved).
- **API fix:** Redesigned Meta ingestion (80% fewer API calls), unblocking an entire vertical that was stalled.
- **Result:** 10+ hrs/week saved per media buyer. 4 external tools replaced. Automation escalations dropped to zero.

2. ACTE: Automated Creative Testing Engine

- Architected the full system for automated creative testing: asset ingestion to winner/loser verdicts, no manual ad ops.
- GCP-native stack (Firestore + GCS + ClickHouse). Auto-creates Meta test campaigns via Marketing API. Auto-pauses losers.
- Test vs scaling campaigns separated by naming convention enforced at the connector layer. 8-week MVP planned.

3. Owned & Operated Affiliate Lead Gen Properties

- **HouseCrew:** 18-page site, built in 4 days. Thumbtack API, GTM, GCP/CI-CD, postback automation. 4 services live with ad spend.
- **QuickHomeFix:** Full platform in 40 days. 6 buyers in production with ZIP coverage mapping and rejection analysis.
- **Attribution model:** Pixel fires Lead on submit, CAPI fires Purchase on buyer acceptance. Zero postback failures since launch.
- 5+ properties live across Meta, Snapchat, TikTok, Google, and Newsbreak.

4. Full-Funnel Affiliate Tracking & Attribution

- **Snap CAPI Gateway:** Diagnosed Poor EQS on a $1M+ pixel (RedTrack sending empty PII fields). Built custom gateway: Everflow postbacks to SHA-256 enrichment to corrected Snap CAPI. Multi-vertical, multi-pixel.
- Server-side Meta CAPI on all properties (9+ EQS). Granular 2-min/5-min Ringba postbacks for call attribution.
- 6 live buyers onboarded end-to-end. Proactive postback verification as team standard: zero failures since adoption.

5. AI-Driven Platform Management (MCP)

- 3 custom MCP servers: ClickHouse (natural language DB queries), Meta Ads Manager, and Snapchat Ads Manager (built from scratch, no third-party equivalent).
- Campaign data queries reduced from minutes to seconds.

6. CRO: Affiliate Landing Page Performance

- LPCTR: 8.72% to 10.22% (+17.2% relative uplift) measured over two consecutive 30-day windows.
- Blur-effect health vertical lander hit 26.44% LPCTR, setting a new performance benchmark.

TECHNICAL SKILLS

Languages & Frameworks	Data & Infrastructure	Ad Platforms & Tracking	Cloud & DevOps
Java · Spring Boot · Node.js · JavaScript · Vue.js	ClickHouse · Kafka · Elasticsearch · BigQuery · Airbyte · Airflow	Meta · Snapchat · TikTok · Google · Newsbreak · RedTrack · Ringba · Everflow	AWS · GCP · Docker · CI/CD · GTM · Meta CAPI · Snap CAPI

EDUCATION

B.E. Electronics & Communication Engineering · Kumaraguru College of Technology · 2018 – 2022
